

Non-Metal Cartridge Filter-Bag Filter**Product Coding**
P46XXXXXX**Introduction**

Bag filters provide a reliable and cost-effective solution for removing suspended particles from a wide variety of liquids. Their depth-filtration media and optimized flow design ensure stable performance, long service life, and consistent product quality. Thanks to their robust construction and availability in different materials and micron ratings, bag filters are suitable for numerous industrial processes ranging from water treatment to chemical production and food applications.

**Features**

- Strong felt media designed for effective depth filtration
- Clean, fibre-free surface to ensure product purity
- Silicone-free manufacturing for sensitive processes
- Made from safe, and industry-approved materials
- Welded structure for improved durability and leak-free operation
- Rounded base for accurate placement inside the basket
- Easy installation and removal with integrated handles
- Clear identification of material type and micron rating
- Secure sealing options to prevent bypass
- Available in multiple material types and filtration grades
- Micron range from fine to coarse to match various filtration needs

Applications

- Water treatment and pretreatment systems
- Desalination processes
- Chemicals and fine chemicals
- Oil, gas, and petrochemical operations
- Food and beverage production
- Paints, inks, coatings, and resins
- Pharmaceutical and cosmetic processes
- Power generation plants
- Microelectronics and precision industries
- Electroplating and galvanic processes
- General industrial liquid filtration
